PROTISA
ECOLOGY OF LIFE

Presentation
Welcome

WHO WE ARE

PROTISA, Productos Tinerfeños S.A., founded in 1995 and based in the Canary Islands, manufactures and commercializes paper products from cellulose and one hundred per cent recycled paper coming from the collection of recovered paper.

Paper factory for professional and daily domestic use every format adapted to different shapes and under different brands to adapt to our clients and markets.

MANUFACTORING IN THE CANARY ISLANDS

Our factory in Güimar is a modern and innovative industry that creates wealth in the Canary Islands.

Training skilled workers in the industry sector, we are a professional workforce: general and production managers, factory workers, sales representatives, administrative operators, quality and environmental technicians.

Presentation
Welcome

FACILITIES

PROTISA's facilities occupy more than 11,000 m², dedicated to productive processes, auxiliary services, offices and storage of raw materials and finished products, keeping the company in constant evolution to adapt it to the market.

SUSTAINABILITY, INNOVATION AND DEVELOPMENT

PROTISA generates a wide range of great quality ecological and natural products without using whitenings or bleach of any kind, a process that gives the paper and added value, becoming a new product, giving it a second life while makes the environment more sustainable.

Commited to research and improvement of production processes, PROTISA incorporates specific staff for its development and innovation.

MANAGEMENT SYSTEM

PROTISA manages its activity according to requirements of the **ISO 14001:2015** Environmental Management standards and **FSC®** (forest management responsible worldwide), integrating quality, environmental, innovation parameters and prevention of occupational hazards.

100% RECYCLED PAPER

- Ecologic toilet paper, 100% biodegradable.
- No bleach or whitenings.
- Made from recycled fibers subjected during its manufacturing process at very high temperatures that sanitize the paper, taking care of the skin and guaranteeing its safe and harmless use.
- Less CO_2 emissions.
- 0% plastic wrapping.
- Target: zero waste.
- Favours circular economy and contributes with the social and ecological responsability we all aim to.
- “Ecology of life”: we give paper a second chance.
- Compact = more product, less space.
